

Herbal Garden

The Herbal Garden in our school promotes awareness about medicinal plants and their importance in health, environment, and traditional medicine. Students learn to identify herbs and understand their uses through observation.

The plants included Elaichi (Zingiberaceae), Ajwain (Trachyspermum ammi), Aloe Vera (Aloe vulgaris), Patharchatta (Kalanchoe pinnata), Kalmegh (Andrographis paniculata), and Tulsi (Ocimum tenuiflorum), along with other medicinal herbs and climbers.
